June 14	Staff Last Day

8 Professional Development Days	930 Instructional Hours
186 Instructional Days	5 Hour School Day

day, 2:Monday

## INSTRUCTIONS

### « Choose the year and beginning month

Note: If you choose Monday as the start day, you will need to modify some of the formatting in the calendars (bold vs. non-bold days).

**Publishing your calendar.** If you want to publish a school calendar, you must ensure that it includes the following note and URL in the footer: **Calendar Templates by Vertex42.com - <https://www.vertex42.com/calendars/school-calendar.html>**

**Converting the calendar to a PDF.** To publish a school calendar on your website, you should first convert it to a PDF. The best way to do that is to print to a PDF driver. See the video demo and info on the Vertex42 website.

**Background colors.** The background color for the weekends and blank days are controlled using conditional formatting. To edit, select the cell(s) and go to Format > Conditional Formatting.

**Changing the color scheme.** You can either manually change the formats of the cells (and the conditional formatting rules), or you can update the color palette by going to Tools > Options > Color, and picking different colors for the 2nd column of the palette.

**Overwriting formulas.** You can overwrite a formula to place an "H" in place of a holiday for example. Be very careful if you copy/paste days so that you don't mess up the formulas. You can copy/paste the formulas for the days *within* the same month, but *not between* months.

**View the Print Area.** To view the current print area, go to File > Print Preview then close the print preview, or go to View > Page Break Preview. The print area will then be highlighted with a dashed line. To choose a new print area, select the cells you want to include and go to File > Print Area > Set Print Area.
